

The Bench mounting kit holds the aerosol can and the Trigger Grip neatly at the workbench. It keeps them both from tipping, which extends the life of the Trigger Grip. Perhaps even more importantly, aerosols used with the bench mounting kit are guaranteed to empty completely, saving money and avoiding a source of hazardous waste. These savings go right to the bottom line.

This product is compatible with both the the Trigger Grip, MCC-ESD, and the Slo-Flo Trigger Grip, MCC-ESD2, as well as all the Microcare aerosol cans.
