

Universal Flux Remover

Universal Flux Remover is the very first deployment of a totally new chemical formulation available only from MicroCare. This product is a highly effective, nonflammable, ozone-safe flux and paste remover for PCBs. It is ideal for cleaning electronics during rework and repair, spot cleaning in assembly operations, or in field-service and warranty repairs. Universal Flux Remover can be used on SMT boards, thru-hole boards, BGA boards, hybrids and connectors. It also is a precision degreaser for safely removing organic contamination.

But this cleaner does more. It's completely VOC-exempt and ozone-safe. But even more importantly, it has an ultra-low Global Warming Potential (GWP) of 1. Universal Flux Remover is formulated and packaged for long-term regulatory compliance in every market around the world, without sacrificing either cleaning performance or safety. It is safe for people, safe for the planet, safe for your PCBs and safe for your budget: a win-win in anybody's book. Available ONLY in aerosol.

- Cleans rosin and no-clean fluxes and pastes
- Removes oil & grease
- Fast drying, low aroma
- High purity, no residues
- Non-flammable
- Excellent silicone remover
- Plastic-safe
- TriggerGrip™ cleaning system compatible

Technical Details

Odor	Slight
Boiling Point	19°C / 66°F
Chemical Family	HFO Solvents
F-Gas Compliant	✓
Evaporation Rate	Fast
Cleaning Strength (Kb)	34
Active Ingredients	HFO Solvents
Flashpoint	None
Global Warming Rating (100yr)	1
VOC Organic Content (g/L)	59
REACH & ELINCS Compliant	✓
RoHS and WEEE Compliant	✓
Safety Rating	Non-Flammable
Specific Gravity	1.24
Vapor Pressure @ 20°C	1.91
